Hill Demonstration Forest

	HF2	HF2
Watershed size (ha/ac)	12/30	40/99
Stream length (m/ft)	260/853	960/3149
Stand type	Mixed-pine hardwood	
Stand Age (years)	35	
Slope (%)	13	
Geologic Features	Carolina Slate Belt	
Dominate Soil Series	Tatum and Appling	
Soil characteristics	Non expansive clays, no perched water, deep soils, and discharge water slowly throughout the year due to large amounts of stored water in bedrock and topographic control.
